DISCUSSION/RATIONALE:

This Deferred RCRA Subtitle C" site has been re-evaluated in Region II by both the Superfund and RCRA programs (Memo: M. Poetzsch, RCRA Program Branch to Cathy Moyik, Program Support Branch dated 6/17/98.) Based on these joint evaluations it has been determined that this site meets all the requirements for archiving.

Superfund's re-evaluation of the site, within a framework of national standards that define the selection of sites for inclusion on the National Priorities List (NPL) for CERCLA authorized remediation, has resulted in a determination of no further remedial action planned (NFRAP). A NFRAP designation means; to the best of the EPA's knowledge, Superfund has completed its assessment at a site, and has determined that no further steps to list this site on the NPL will be taken, unless information indicating this decision was not appropriate or other considerations make a recommendation for listing appropriate at a later time. A NFRAP decision does not necessarily mean that there is no hazard associated with a given site; it means only that based upon available information, the location is not judged to be a potential NPL site. Sites for which a NFRAP determination was made are now being removed from the CERCLIS database and archived as historical records to ensure that EPA does not needlessly stigmatize these sites as potential NPL sites.

Based upon a file review, it has been determined that this site is an alias for Pittsburgh Metals & Graphics NJD981490295. Pittsburgh Metals was a NFRAP following a Site Inspection Prioritization on 9/30/92. The site has also been subject to removal actions. RFE Industries was a RCRA deferral that was returned to site assessment, but as Pittsburgh has been NFRAPed, the deferral qualifier of the RFE Industries has been changed to a NFRAP to reflect this decision.
